ADR PASTE & POWDER

A unique digestive aid containing the most effective mannanoligosaccharides available to bind pathogenic bacteria in the intestine and boost immune response along with a specifically selected blend of direct fed microbials that work in a synergistic manner to provide the greatest boost to the horse's digestive system available.

ADR is a blend of:

Probiotics:

- Lactobacillus acidophilus
- Enterococcus faecium

Prebiotics:

- Mannanoligosaccharides
- Yeast cultures
- Beta-glycans
- Anti-oxidants

Use ADR to:

- Help alleviate diarrhea in foals and mature horses
- Support normal blood glucose and insulin sensitivity
- Support desired fermentation in the horse's large intestine
- Support desired immune response
 - Aids in maintaining desired blood IgG levels
 - Aids in maintaining desired intestinal IgA levels
- Support weight management issues
- Support normal health of intestinal tissue
- Reduce gas production in large intestine, and
- Stimulate appetite

Probiotics in ADR still meet label guarantees after 2 years.

- 1 tube of ADR paste supplies approximately 60 billion CFU's
 - 30 billion each of Lactobacillus acidophilus and Enterococcus faecium
- 1 scoop of ADR powder supplies approximately 40 billion CFU's
 - 20 billion each of Lactobacillus acidophilus and Enterococcus faecium
