THIN FLEX™

IV Catheter, Elastic Stretch Tape

Unlike rigid tapes that can restrict mobility, the elastic properties of Thin Flex allows for a supportive hold with flexible compression while remaining secure in the application which can help minimize the risk of "Mega Paw" (edema).

- Easy tear
- Elastic stretch
- Light weight
- Latex free
- Breathable two-way stretch fabric with a moisture resistant finish
- Will not stick to fur; clean removal
- Available in standard white
- Available in pink for color coding catheters or can alert staff of patient's drug specification (ie. cancer medications)
