

GOT PAIN?

Get Proof? Get Relief?

» Proof, Meet Relief. «

The Stance Analyzer supports both new and existing laser therapy users by providing the proof that pet owners need to move forward with a recommended plan of care. Laser therapy is the most versatile tool in your clinic, and the Stance Analyzer detects the patient population to fuel your laser business.

- » **IDENTIFY LASER CANDIDATES**
The Companion Stance Analyzer detects early lameness abnormalities on 10% of wellness visits, identifying an ideal patient population for laser.
- » **PROVE PAIN**
A diagnostic print-out helps communicate your findings to pet owners and encourages compliance with your recommended plan of care.
- » **RELIEVE PAIN**
Laser therapy is the ideal pain relief tool for both preventative care and early lameness intervention. Treatments are fast and painless.
