## OLYMPIC DENTAL TABLE™

### **Northeast Community College**

Norfolk, NE

Mike Cooper, DVM

“ We purchased two Olympic Dental Tables to use for our daily dental procedures. Without a doubt the perforated dental table kept our patients dryer, and it was much more user-friendly to our Doctors and Technicians performing the dentals. There was no bucket hanging down from the table to spill all over the floor, and the electric adjustment is very nice so that our technicians can have the correct height to prevent any ergonomic issues. The table cleans very easily and the swing-out arm provides a convenient tray to hold monitors or other essential equipment. Overall, a well thought out table and would highly recommend.”

### **Larkin Veterinary Center**

West Lawn, PA

Fawn Dougherty, Hospital Manager

“ Our Olympic Dental table has been a life saver in our small dental area. The new table has greatly reduced the amount of time that it takes to perform dental radiographs and cleanings by making patient placement easier and more convenient than a standard flat table. Our Veterinarians enjoy and appreciate the ability to rotate, tilt, and maneuver the patient for access during extractions and our Technicians appreciate the narrowness that allows them to easily maneuver around. I would highly recommend this as a go-to table for anyone looking to replace their current dental set-up.”

### **Didsbury Veterinary Services**

Didsbury, Alberta

Karla Quantz, Technician

“ We love our Olympic Dental Table! Whether you want to sit or stand, it conforms to everyone! It is so easy to clean and takes up far less space than our previous table. We would strongly recommend this dental table to everyone!”
