Features and Benefits

FEATURES	BENEFITS
SuperHarmonic™ Engine	Proprietary imaging capability with enhanced contrast resolution, provides the system with imaging performance unrivaled in the industry
ECG	ECG Capabilities
Grab-and-Go Portability	Less than 5 lb, ready to go wherever and whenever you need it.
Small Footprint	Provides high-end imaging without taking up space in small work environments.
Smart Gestures	The user and the system become integrated, resulting in faster response times and increased productivity. Gestures are familiar, as they are the same as for conventional tablet PCs or Smart Phones.
TeraSon Capacitive Touch Screen	TeraSon's unique screen technology allows quick navigation for the best possible workflow. The user can perform familiar gestures like tapping, swiping, pinching and stretching, even with wet or gloved hands. Also offers the option of using a stylus for precision input.
Advanced Hyper Viewing Angle (AHVA) LCD	The AHVA allows the user to view the image from multiple angles and heights without losing image resolution.
Solid State Drive (SSD)	Faster processing speed increases frame rate.
Broad Applications and Presets	Offers the user multiple applications and options for scanning.
uConnect®	Instant access to clinical and technical specialists via the web.
DDR™	Dynamic Depth Resolution is a high-resolution uniform imaging algorithm a for better image quality at any depth.
ENV	Enhanced Needle Visualization uses second generation technology, providing better needle visualization at steeper angles without image degradation or a drop in frame rates.
OmniBeam	Compound imaging with a specialized multi-beam focus that provides clear visualization of structural interfaces, sharper edges and no blind spots.
TeraVision™ II	Unique algorithm for clear delineation of structures to enhanced diagnostic confidence.
TeraScape™	Panoramic imaging that is perfect for evaluating and measuring lesions that are larger than the transducers' natural footprint.
Removeable Battery	Enables extended use in a wide range of environments where access to AC power is not available
Cardiac imaging capabilities	CW Doppler, ECG Capabilities not found on other small, portable systems
Durability	Gorilla Glass, SSD, Durability/Vibration tested
