

2025 CAPC ANNUAL PET PARASITE FORECASTS

The Companion Animal Parasite Council (CAPC) has released the 2025 forecasts for:

- ▶ Heartworm
- ▶ Lyme Disease
- ▶ Ehrlichiosis
- ▶ Anaplasmosis

Historically, the forecasts have been >94% accurate in predicting the true prevalence of these four diseases across the United States. Use the maps to educate pet parents on the risks in your area and support your recommendations for year-round preventatives.
