PRODUCT HIGHLIGHTS

Syringes

- Value-priced line of disposable syringes and combos for everyday veterinary use
- Available in both hard packs and standard soft packaging
- Offered in Luer Lock (LL) and Luer Slip (LS) tip options
- Clear polypropylene barrel with easy-to-read graduations to help reduce dosing errors
- Quality plunger design supports maximum fill and helps reduce spills
- Sharp Bevel A needles for smooth injections
- Latex-free and single-use
- Multiple sizes and configurations available from 1cc to 60cc

Hard Syringes

Soft Syringes

IV Catheters

- Designed for smooth, reliable vascular access across a wide range of patients
- Available in both flash and flow styles
- Sharp stainless steel needles support consistent insertion
- Kink-resistant catheter material helps maintain flow and performance
- Quick flashback confirmation for added placement confidence
- Color-coded by gauge for fast, easy identification
- Sizes available from 14G to 24G with multiple length options
- Built to support comfort, consistency, and clinical control

Flow

Sharps Containers

Protect your patients and employees with our FDA 510K compliant Sharps Containers. Made in the USA, all Sharps Containers are bracket compatible for cleanly and organized exam rooms. The lids cannot be lost and are not palm-push designs, which helps reduce the risk of needle sticks.
