

Do you have a cat at home?

*Your cat would probably rather stay home.
But you'd rather know they're healthy.*

Cats are masters at hiding pain and illness, often showing few signs until a condition becomes advanced.

That's why annual wellness exams are so important. Regular checkups help identify health concerns early, keep cats comfortable, and add healthy years to their lives.

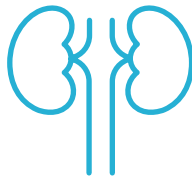

During a wellness exam, we will screen for:

✓ **Weight
& obesity
concerns**

✓ **Dental
disease**

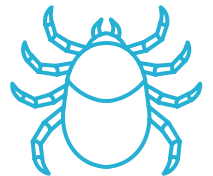

✓ **Kidney
disease**

✓ **Arthritis**

✓ **Diabetes**

✓ **Parasites
& preventive
care**

Your cat may look healthy, but preventive care helps uncover problems before they become serious.
